

# Trace-A-Matic | Houston

## Turn-Key Manufacturing Solutions

Trace-A-Matic | Houston partners with customers to provide turn-key solutions for their long-term manufacturing programs. Our programmatic approach offers complete control from start to finish over prototype development, procurement, product quality, kitting and assembly, inventory control, and on-time delivery of finished precision goods.

### Precision Machined Components and Assemblies For

Defense, Heavy Equipment, Space | Aerospace, Oil and Gas, and Nuclear Industries

### Machining Services

- CNC Engineering
- Horizontal Milling: 86.5" x 63" x 73"
- Vertical Milling: 120" x 32.8" x 28.3"
- Horizontal Turning: 118" x 33"Ø
- Vertical Turning: 79"Ø x 65"
- CMM: 79" x 130" x 59"
- Complete Fabrication

### Certifications

- ISO9001 Certified with a rigorous QMS
- API Specification Q1
- ITAR Registration

### Machining Capability

- Precision CNC machined parts from castings, forgings, fabricated weldments, tubing, billets, metal plate, sheet metal, and bar stock weighing 15,000 pounds.
- We are experts at machining aluminum, armor plate, brass, bronze, chromium, copper, gammalloy, Hastelloy, Incoloy, Inconel, Invar, Monel, nickel, Nitralloy, powdered metals, stainless steel, Stellite, titanium, Waspaloy, and many other superalloys.
- Trace-A-Matic provides complete manufacturing solutions with an extensive managed network of subcontractors and material suppliers.
- 65,000 sq. ft climate-controlled manufacturing capacity, 30+ precision machining centers, and a highly-skilled workforce serving the US and international customers.

**Trust Trace-A-Matic to get it right the first time — And every time!**
