

Construction Equipment Solutions

A Programmatic Approach to Complete Manufacturing

Trace-A-Matic partners with **construction equipment OEMs** to provide turn-key solutions for their **long-term manufacturing programs**. Our programmatic approach offers complete control from start to finish over prototype development, procurement, product quality, kitting and assembly, inventory control, and on-time delivery of mining parts and assemblies.

Supported Agriculture Equipment Types:

Backhoes, Bulldozers, Compactors, Dump Trucks, Excavators, Graders, Loaders, Scrapers, and Trenchers

Precision Machined Components:

- Large Shafts and Axles
- Transmission Housings
- Bearing Blocks
- Gearbox Components
- Gear Blanks
- Head Nuts
- Labyrinth Seals and Components
- Levers
- Hydraulic Components
- Actuators
- Rotors

Certifications and Capabilities:

- ISO 9001:2015 certified built on a rigorous Quality Management System
- Precision CNC machined parts from castings, forgings, fabricated weldments, tubing, billets, plate, sheet metal, and bar stock weighing up to 15,000 pounds.
- Experts at machining aluminum, armor plate, brass, bronze, chromium, copper, gammalloy, Hastelloy, Incoloy, Inconel, Invar, manganese, molybdenum, Monel, nickel, Nitralloy, platinum, powdered metals, stainless steel, Stellite, titanium, Waspaloy, zinc, and other superalloys.
- Complete manufacturing solutions with an extensive managed network of subcontractors and material suppliers.

Trust Trace-A-Matic to get it right the first time — And every time!
