

Food Processing Solutions

A Programmatic Approach to Complete Manufacturing

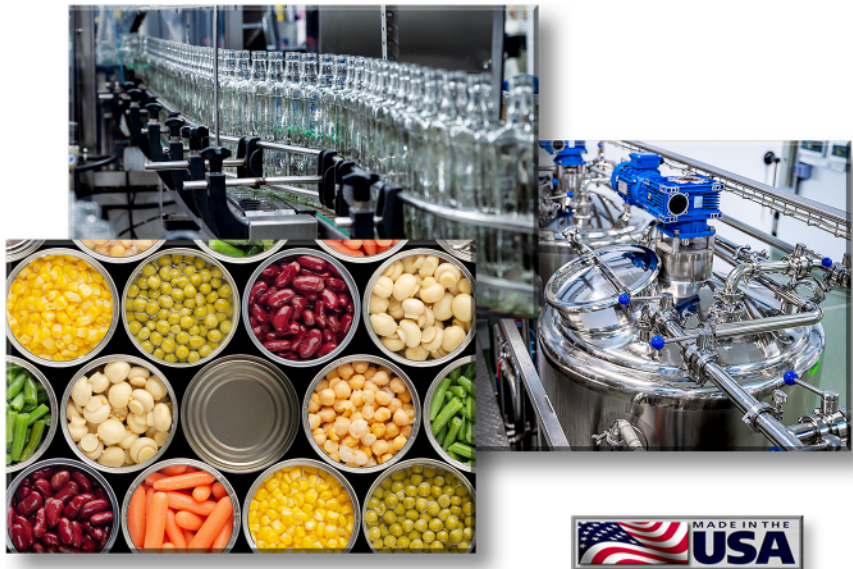

Trace-A-Matic partners with **food processing OEMs** to provide turn-key solutions for their **long-term manufacturing programs**. Our programmatic approach offers complete control from start to finish over prototype development, procurement, product quality, kitting and assembly, inventory control, and on-time delivery of food equipment parts and assemblies.

Supported Food Processing Methods:

chopping, cooking, emulsification, fermentation, gasification, liquefaction, mincing, mixing, pasteurization, peeling, proofing, slicing and spraying

Precision Machined Components:

- Pump Shafts and Housings
- Centrifugal Pumps
- Metering Extruders
- Forming Mandrels
- Pump Boxes
- Depositing Rolls
- Mechanical Machine Assembly
- Knife Shafts
- Spray Bars for Coating Pan
- Gearbox Components
- Actuators
- Large Shafts

Certifications and Capabilities:

- ISO 9001:2015 certified built on a rigorous Quality Management System
- Precision CNC machined parts from castings, forgings, fabricated weldments, tubing, billets, plate, sheet metal, and bar stock weighing up to 15,000 pounds.
- Experts at machining aluminum, armor plate, brass, bronze, chromium, copper, gammalloy, Hastelloy, Incoloy, Inconel, Invar, manganese, Monel, nickel, Nitralloy, powdered metals, stainless steel, Stellite, titanium, Waspaloy, and other superalloys.
- Complete manufacturing solutions with an extensive managed network of subcontractors and material suppliers.

Trust Trace-A-Matic to get it right the first time — And every time!
