

Mining Equipment Solutions

A Programmatic Approach to Complete Manufacturing

Trace-A-Matic partners with mining equipment OEMs to provide turn-key solutions for their long-term manufacturing programs. Our programmatic approach offers complete control from start to finish over prototype development, procurement, product quality, kitting and assembly, inventory control, and on-time delivery of mining parts and assemblies.

Supported Mining Equipment Types:

Dragline Excavators, Hydraulic Mining Shovels, Electric Rope Shovels, Bucket-Wheel Excavators, Wheel Tractor Scrapers, Bulldozers, Mining Trucks, Mining Drills, Crane Lifts, Crushing, Surface and Underground Material Handling Equipment

Precision Machined Components:

- Large Shafts and Axles
- Transmission Housings
- Bearing Blocks
- Gearbox Components
- Gear Blanks
- Head Nuts
- Labyrinth Seals and Components
- Levers
- Hydraulic Components
- Actuators
- Rotors

Certifications and Capabilities:

- ISO 9001:2015 certified built on a rigorous Quality Management System
- Precision CNC machined parts from castings, forgings, fabricated weldments, tubing, billets, plate, sheet metal, and bar stock weighing up to 15,000 pounds.
- Experts at machining aluminum, armor plate, brass, bronze, chromium, copper, gammalloy, Hastelloy, Incoloy, Inconel, Invar, manganese, Monel, nickel, Nitralloy, powdered metals, stainless steel, Stellite, titanium, Waspaloy, and other superalloys.
- Complete manufacturing solutions with an extensive managed network of subcontractors and material suppliers.

Trust Trace-A-Matic to get it right the first time — And every time!
