

Medical Device Solutions

A Programmatic Approach to Complete Manufacturing

Trace-A-Matic partners with **medical device OEMs** to provide turn-key solutions for their **long-term manufacturing programs**. Our programmatic approach offers complete control from start to finish over prototype development, procurement, product quality, kitting and assembly, inventory control, and on-time delivery of medical equipment parts and assemblies.

Supported Medical Device Types:

Electronic, Diagnostic, Surgical, Durable Medical Equipment (DME), and Transport

Medical Equipment Components For:

- Anesthesia Machines
- Cobalt-60 Machines
- CT Scanners
- Diagnostic Equipment
- Electronic Equipment
- Linear Accelerators
- MRI Scanners
- Precision Medical Products
- Surgical Instruments
- Ultrasound Equipment
- X-Ray Equipment

Certifications and Capabilities:

- ISO 9001:2015 certified built on a rigorous Quality Management System
- Precision CNC machined parts from castings, forgings, fabricated weldments, tubing, billets, plate, sheet metal, and bar stock weighing up to 15,000 pounds.
- Experts at machining aluminum, armor plate, brass, bronze, chromium, copper, gammalloy, Hastelloy, Incoloy, Inconel, Invar, manganese, Monel, nickel, Nitralloy, powdered metals, stainless steel, Stellite, titanium, Waspaloy, and other superalloys.
- Complete manufacturing solutions with an extensive managed network of subcontractors and material suppliers.

Trust Trace-A-Matic to get it right the first time — And every time!
